Changing Your CAMS Password - Students

Prior to using systems that require Active Directory (AD) login information, you may need to change your password in CAMS. Once this has been updated with a password of your choosing you should have immediate access to CAMS, Blackboard, GoPrint, HelpDesk, and other AD authenticated systems.

1. Go to http://www.aic.edu and hover over the E-Campus tab. Select Student Registration Portal from the dropdown menu.

2. On the CAMS login page enter your student ID in the username field and type your current CAMS password. Click the Login button to proceed. 
   *Alternately: you can use the Reset Password link on the CAMS homepage. This will require you to enter your date of birth, though you can skip your social security number.*

3. You should now be logged into the CAMS system. Click on the link in the top-left corner to Change Password.
4. On the next screen type your old password and then enter your new password twice. Be sure to follow the guidelines for the new password; it must contain the following:
   - At least one of each of the following: uppercase letter, lowercase letter, numeral
   - At least six total characters

5. You should now have access to CAMS, Blackboard, and other systems that require Active Directory login information.
